

Mercury Use in the Chlor-Alkali Industry

Binational Toxics Strategy
Mercury Work Group Meeting

May 17, 2005

Art Dungan
Vice President – Safety, Health, &
Environment
The Chlorine Institute, Inc.

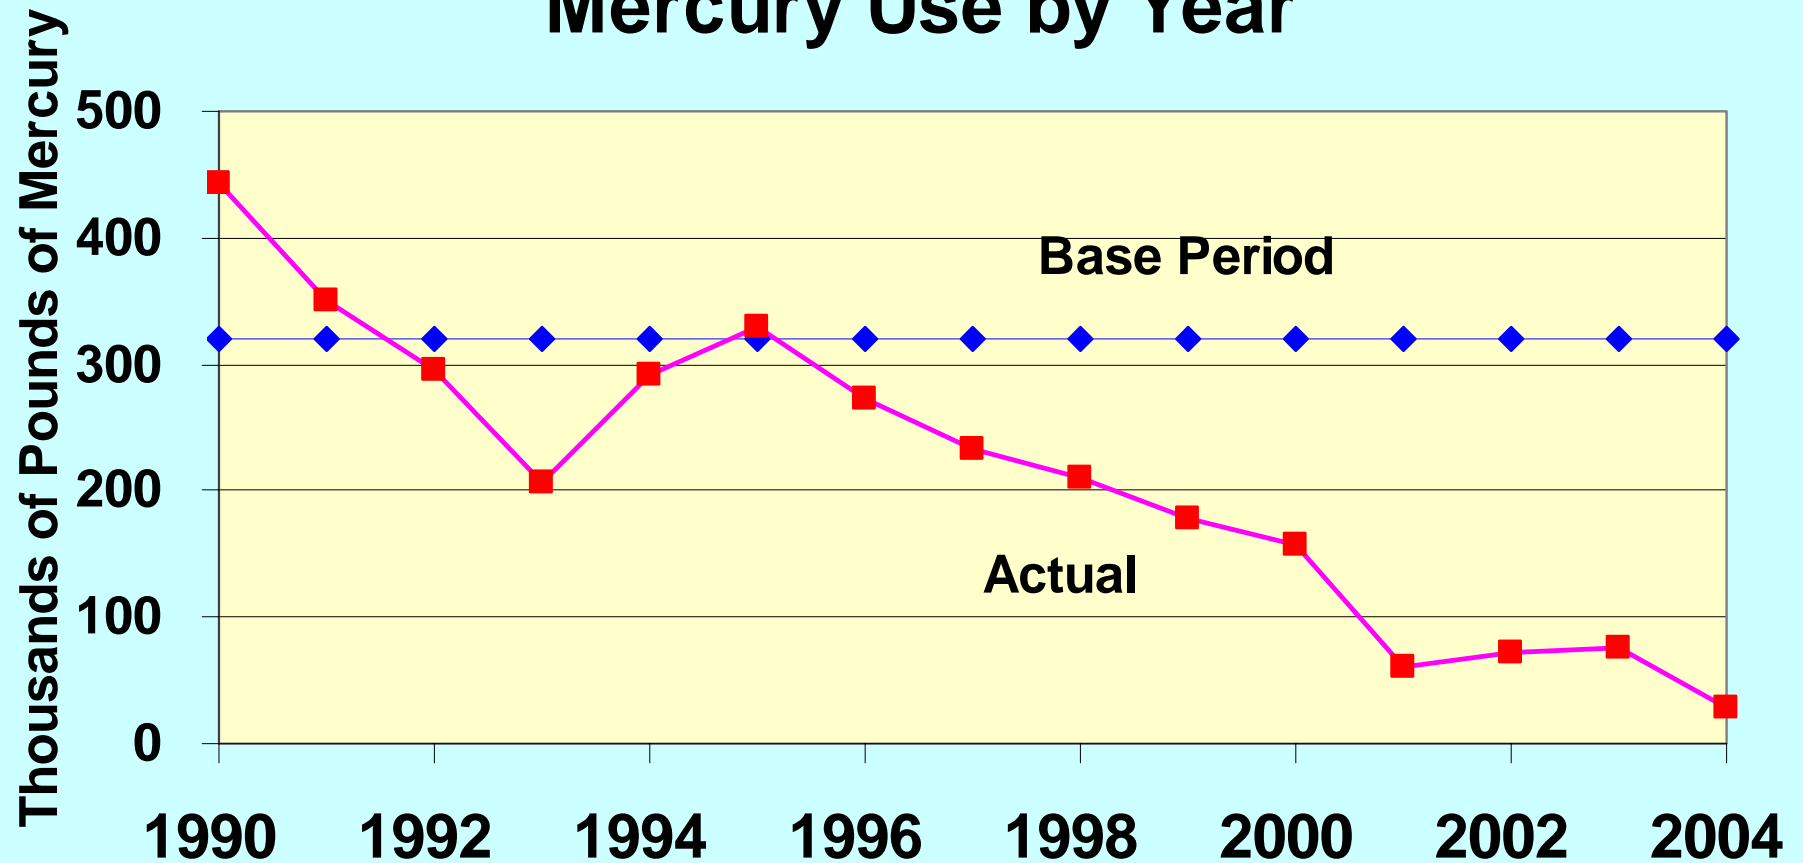

Commitment to BTS

- In 1996, the USA Mercury Cell Chlor-alkali industry committed to a 50% reduction in mercury use by 2005 in support of the US Binational Toxics Strategy Goal
 - CI/Industry committed to provide EPA with an annual progress report

Commitment to BTS (continued)

- Last Friday (May 13) – CI issued its Eighth Annual Progress Report. Copies are available in the back of the room.
- November 30, 2004 – Comprehensive Report of Activities and Progress at the Mercury Work Group Meeting.
- Today – Brief summary of the numbers. See the report for details.

Mercury Use by Year

Mercury Use Since 1990 Per Ton of Chlorine Capacity

Mercury Used per Ton of Cl₂ Capacity
